RADIKALWORLD®

BEYONDTHELIMITS

The Yacht "Tecnomar for Lamborghini 63" is not simply an exercise in style and design but she also represents the avant-garde of luxury speed boats. Inspired by the performance of Lamborghini supersport cars, there are two innovative elements at the basis of her design concept: speed and dynamic weight. The two engines MAN V 12 – 2000HP allow the yacht to reach the impressive speed of 60 knots, while the use of carbon fiber (a typical element of the cars of Sant'Agata Bolognese) guarantees the classification in the range of ultralight boats with a maximum weight of 24 tons for 63 feet in length.

Terzo Millennio, Sián FKP 37: these are the main inspirations.

FULLY CONFIGURABLE SLOT

THE YACHT “TECNOMAR FOR LAMBORGHINI 63”
IS AVAILABLE IN **THREE MAIN VARIANTS:**

LOUNGE VERSION

Open space is the concept, functional and essential, with a galley fully equipped, day head for guest and storage, a big open space with lounge sofas and wardrobe. Last but not least the owner private bathroom in order to have always your privacy.

ONE CABIN VERSION

Maintaining the design and style of the lounge version, galley it's divided by the bow area, thus obtaining a king size bed from the bow sofa. The forward cabin is therefore equipped with large spaces and a dedicated owner bathroom.

TWO CABIN VERSION

Two independent cabins is the new solution to optimize spaces and have the best of comfort. Master cabin at bow with its king size maintains comfort levels worthy of a super luxury hotel. The guest cabin was created to accommodate a couple of friends or two children, thanks to the possibility of having two separate singles bed that can be joined together in a large one.

INTERIORS

The INTERIORS are the result of a high-tech design based on the use of high-tech materials in terms of weight and functionality, perfectly combined with the best craftsmanship tradition of Made-In-Italy. The unmistakably automotive inspiration proposes iconic elements of the Lamborghini design, such as hexagons, clean lines, Y. Colors and materials are, 100% customizable through the program Ad Personam.

The Pilot Cabin interprets the automotive cockpit in a nautical key, in which all navigation and monitoring systems are fully integrated. As in the supersport Lamborghini are also the details in carbon fiber, the use of the Carbon Skin, the supersport seats and the rudder/ steering wheel. Finally, the unmistakable "start&stop" button (present on the yacht in two units, one per engine) is the same that starts the engine of the Lamborghini Car.

EXTERIORS

The design of the EXTERIORS is the result of the close collaboration between the two Centro Stiel and has led to the creation of a cutting-edge silhouette, completely out of any typical nautical scheme. The super-performing hull comes from the design of the team of naval engineers specialized in the study of computational fluid dynamics while hull and superstructure relaunch in a contemporary key the lines created by designer Marcello Gandini for the iconic Lamborghini cars Miura and Countach from the '60s and '70s.

The Hard Top is inspired by Lamborghini's roadster models; it provides not only protection from the sun and wind but also amazing aerodynamic performance. The bow lights are a tribute to the concept
